Dear friends and colleagues,

We wish to give you our warm welcome to the “III International Congress on Dual Pathology” which will be taking place from the 23rd to the 26th October 2013 in the city of Barcelona.

Dual Pathology or what is the same, the concurrence of disorders due to intake of substances and other mental disorders is today a clinical reality which is affecting a high number of our patients.

The Sociedad Española de Patología Dual (SEPD) is, once again addressing all those professionals dealing with Addictions, Psychiatric Addictions and Mental Health to take the floor and discuss about all that is already known as the challenge of Dual Pathology.

On the basis of the success obtained by our previous international meetings which took place in Madrid (2008) and in Barcelona (2011), the target of this new edition is to consolidate a platform on which professionals on addictions and mental health, together with opinion leaders in this field, update and share knowledge and developments.

The subjects to be discussed are etiopathogenesis, diagnosis and therapies in dual pathology, from the advances in molecular biology to daily clinical attention, from preventive strategies to recovery programs.

Participation possibilities, both in Spanish and English, are wide for all those disciplines related to dual pathology, by plenary lectures, symposia, workshops, meetings with the expert, orals and posters.

We have as well programmed a special two day symposium entitled « Parallel Symposia on Dual Diagnosis Healthcare givers » with the target of revising evidences for and against the theory that maintains that those responsible for the care of these patients suffer Dual Pathology as a reflection of the patients they care for.
We encourage you all to take an active part in the Congress, to submit proposals to the different sessions in the scientific program.

As the Organising Committee members, we feel proud of the great support received from peers, and from the most relevant national and international mental health, psychiatric, institutions and institutions dealing with drug dependencies, this institutional fact is highly reflected by their patronages to the Congress.

We feel sure that Barcelona will provide, once again, an extraordinary setting to host a high quality meeting, with its two thousand years of history reflected in its monuments, streets and museums, together with its modern, cosmopolitan and mediterranean environment.
